Bee Trak

Vendor Managed Inventory (VMI)

BUILT ON OPERATOR INSIGHT

What We Heard

- "Inventory levels swing unpredictably, creating avoidable risk and waste."
- "Manual tracking drains time and distracts from higher-value operations."
- "Paper-based depletion and destruction logs cause errors and delays."
- "Forecasting relies on generic estimates instead of real demand pattern."

KEEP GAMES RUNNING.
REDUCE WASTE.
ELEVATE COMPLIANCE.
PROTECT YOUR REVENUE.
CONFIDENCE IN YOUR DECISIONS.

THE SOLUTION

What Bee-Trak Delivers

- Right-Sized Inventory: Automated replenishment ensures the stock you need. Never too much, never too little.
- Real-Time Tracking: Digital monitoring of depletions and verified destruction reduces errors and reliance on manual workflows.
- Smarter Forecasting: Seasonal and consumption-based insights drive accurate, proactive production of Bee® stock.
- Operational Efficiency: Streamlined requests and web-based communication reduce internal friction across pit and C&D teams.
- Compliance & Control: Clear inventory change logs and exportable transaction records strengthen accountability and audit readiness.

UNLOCK HIDDEN REVENUE AND REDUCE RISK WITH BEE-TRAK'S STREAMLINED HARDWARE & SOFTWARE PAIRING.

- User-defined Material Names
- Visibility to Open Orders & Deliveries
- Analytics Platform with Pivot Data
- Stock Threshold Alerts
- Impress Summary
- Multi-property Views (enterprise)

Bee Trak

How It Works

1. BEE-TRAK FOLLOWS EVERY DECK.

Order shipped from USPCC→ enter Casino C&D Vault→ Cards hit tables → Sent for destruction/Quarantine,
Bee-Trak tracks where every deck is.

2. REAL TIME INVENTORY CONTROL.

Barcode scanner + digital dashboard = real time inventory management
You always know what you have, what's low, and what to reorder with replenishment alerts.

3. INTERNAL ORDERING WORKS LIKE AN ONLINE SHOPPING CART.

Pick what you need, choose where it goes, and submit. No emails or paperwork.
Faster fills, fewer mistakes, everyone stays on the same page.

4. ONE PLATFORM THAT SHOWS TODAY'S REALITY AND TOMORROW'S NEEDS.

Bee-Trak enhances inventory visibility and usage trends with a single, intuitive portal. Leaders can quickly see current stock, consumption patterns, and projected needs—enabling confident planning and reducing waste.
Fast, informed decisions backed by real-time data and predictive insights.

5. BUILT WITH CASINO-LEVEL SECURITY.

Every scan creates a record, and role-based permissions keep the wrong hands out.
Peace of mind with audit-ready logging and compliance tested functionality.
